

LI – I am learning to write decimal equivalents to simple fractions.

Now that you have watched my direct teaching PowerPoint. Can you please match these decimals to their equivalent fractions?

Remember to write the matching pairs in your jotter.

I will do the first one for you:  $0.1 = \frac{1}{10}$

$\frac{1}{10}$	$\frac{1}{5}$	
$\frac{2}{5}$	$\frac{1}{2}$	
$\frac{3}{4}$	$\frac{4}{5}$	
0.1	0.2	
0.4	0.5	
0.75	0.8
