LI: I am learning to round decimals to the nearest whole number.

If the decimal has 5 or more tenths, we round $\qquad$ -.

If the decimal has 4 or less tenths, we round $\qquad$ .

For example, 5.5 would be rounded up to 6 because there are 5 tenths.

| Decimal | Nearest Whole Number |
| :--- | :--- |
| 3.8 |  |
| 7.5 |  |
| 21.2 |  |
| 46.4 |  |
| 78.5 |  |
| 21.6 |  |
| 39.1 |  |
| 100.5 |  |

## Challenge:

1. What is 12.78 rounded to the nearest whole number?
2. What is 20.35 rounded to the nearest whole number?
3. What is 20.35 rounded to 1 decimal place?
