

3) Find all the number facts you can for the triangle below:

example

$$3 \times 6 = 18$$

$$6 \times 3 = 18$$

$$18 \div 3 = 6$$

$$18 \div 6 = 3$$

4) James buys 6 games at £9 each. How much does he spend altogether?

5) Fill in the gaps below:

$6 \times \underline{\quad} = 24$

$48 \div \underline{\quad} = 6$

$6 \times \underline{\quad} = 54$

$30 \div 6 = \underline{\quad}$

$6 \times \underline{\quad} = 18$

$72 \div \underline{\quad} = 6$

6) Fill in the gaps below:

	2.4	3.0			4.8
--	-----	-----	--	--	-----

7) David says "I'm not confident with my six times tables but I know my threes so I can use these to help."  
Is David correct? Explain your reasoning.
